

EmComm, CERT, QRP

Battery Box

by Tony Gawel W6TNY

CERT (Community Emergency Response Team)
EmComm (Emergency Communications)

QRP (Low Power Operation; example ham radio; 5 watts output / 10 watts input)

Bio

- Director of Information Technology for a large international school and laboratory
- Interest in electronics since elementary school building kits, TV and radio repair.
- Working in computer and electronics field since the 1970s
- Passion for communications, networking,
 WI-FI, and digital systems

Background

- Always looking for better ways to plan, prepare and to make our lives easier.
- Looking first to what is already available (off the shelf)
- Repurposing reusable items headed to the e-waste
- These attributes are what attracted me to amateur radio (Ham Radio)
- Ability to exercise my engineering and creativity skills to design, experiment and then share it with others.

Lawyers

Any lawyers in the audience?

Quick Sliver Go-PWR Plus XL™ 80 Ah. Battery Box

Project Concepts

Provide CERT, EmComm teams and amateur radio organizations with a Emergency Battery Box project that is:

- Low cost
- Fun and simple to build
- Easy to transport
- Requiring minimal tools to assemble.

Objective

A good group/club project

- Low cost
- Gets people involved
- Anyone can do it
- Expandable
- Gets people excited
- Provides a platform people can build on, experiment, and personalize

Uses

- Home preparedness
- Emcomm teams
- Races
- Fire Watch
- Race events
- Disasters
- Meet and Greet Events (PD or Fire Open House)
 - Draw people into the booth to charge their phones
 - Attract attention of the curious

Planning and Selection

- Identify potential uses
 - Charge cell phones
 - Charge or operate HT with a battery eliminator
 - QRP
 - Mobile on low power
 - Mesh Node
 - LED lighting
 - Fans
 - ETC.

Challenges

- Creating a simple to build
- Small
- Lightweight
- Easy to transport
- Affordable
- Expandable
- A concepts that can be used in future projects
- Something that anyone can do and have fun

Dilithium Crystals

Flux Capacitor

Power of the Sun

Power Source

- 7 12 15 Ah AGM battery
 - They low cost (some cases free)
 - Plentiful
 - Lightweight

- 8 Ah LIPO4
- 12 Ah LIPO4
- 20 Ah LIPO4

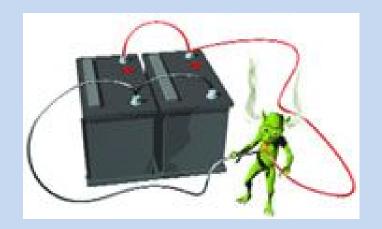

Battery Types

- Before we get too far into the project we need to talk about battery types
- Safety

What works

What doesn't

Safety

Safety

- **Never** disassemble a battery under any circumstances. The materials in a battery are often toxic and can cause severe burns and can damage your clothing.
- Red wire goes to the Positive
- Black wire goes to the Negative
- Never use a fuse larger than one that is rated or recommended for this project
- (Keep some spare fuses in your box)
- Do not short circuit a battery by crossing the positive and negative terminals as you can damage the battery and other electrical equipment components. It can also cause burns and/or injury to you.
- Never throw batteries into a fire as they can split, cause toxic fumes and leak acid.
- Don't reverse the polarity of the battery or you can damage your equipment and the battery.
- Don't use old and new batteries together. This can degrade the batteries.
- Always charge the battery at the correct voltage and amperage after use. Don't over-charge
 the battery as this can damage the battery and cause it to leak. Follow the charging
 procedures from the manufacturer.
- Store batteries in a sealed cool dry place when not in use (battery box).

Battery Types

- Starting/ Cranking
 - High current and short duration
 - Cars and Truck starters

Battery Types

- Deep Cycle
 - Lower Current steady power over long duration
 - Motor Homes
 - Boats
 - Golf Carts
 - Amateur Radio

Deep Cycle Batteries

- Floated Lead Acid
- Gel Cells
- Absorbed Glass Matt (AGM) *
- LiPO
- LiFePO4 *

BioEnno LiFePo4

Bioenno Power 12V, 12Ah LFP Battery and BMS

K2 Energy LiFePo4

K2 Energy K2B12V10EB 12V 10Ah Lithium Iron Phosphate Battery and BMS

Zippy Flightmax LiFePo4

ZIPPY Flightmax 8400mAh 4S2P 30C LiFePo4 Pack

Battery Capacity Level

 On standard batteries you can use voltage as an indicator of the charge level of the battery

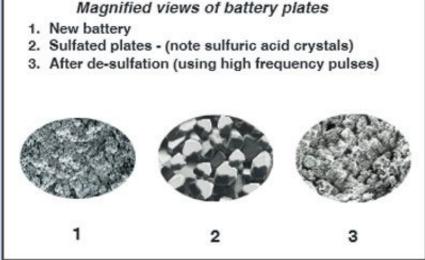

SLA/AGM Battery Charge Level

State of Charge	AGM battery	
100%	12.80+	
75%	12.6	
50%	12.3	
25%	12	
0%	11.8	

Battery Care

- For long battery life store your battery fully charged and check it once quarter
- This minimizes sulfating of the plates which can happen over time Magnified views of battery plates

Batteryminder.com

Sulfating

- Sulfating happens when lead sulfate crystals build up on the lead plates.
 - Loss of capacity, shorter run times
 - Premature failure
 - Longer charging times
 - Excessive heat build up
 - cells causing loss of capacity and early failure

Charging

- Flooded Lead Acid
 - Constant current, constant voltage (CC/CV)
 - about 13.8 to 14.4 v Float 13.2 13.4
 - 12 to 16 hours
- AGM
 - Sensitive to overcharging
 - Multi stage charger to reduce over heating and prevent gassing
 - Charge 14.4 Float 13.5 13.8 v
- LiFePo4
 - Depends on battery

What is C

- The C rating specifies the how fast a battery should discharge or charge
- A 1C rate, the battery will charge or discharge as the marked Ah rating of the battery.
- At .5C the current rate is ½ the marked rate and the time doubles.

Proper Charging

- Single stage charger
 - Single output charge voltage and no shut off when fully charged
 - Can overcharge battery
 - Cause overheating
 - Premature battery failure

Charging

- Multistage Charger (Low and Slow)
 - Bulk
 - Additional Stages
 - Trickle
 - Float
 - De-sulfate

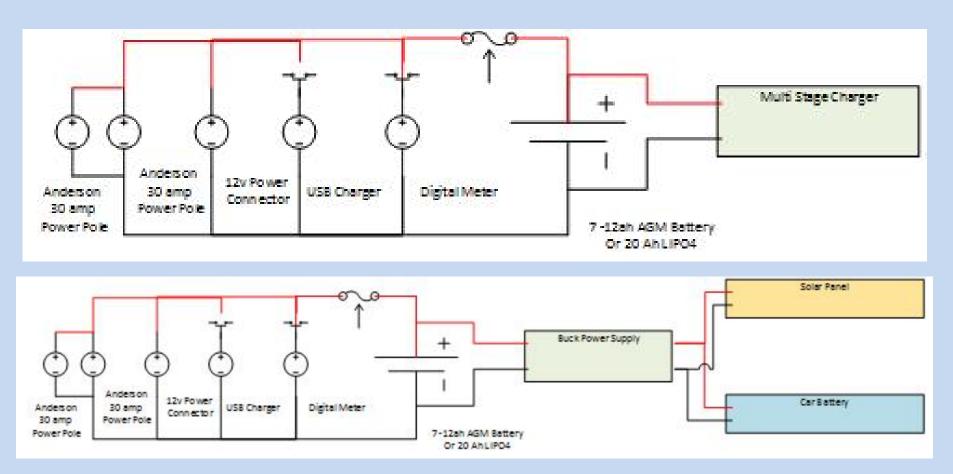

Charging Schematic

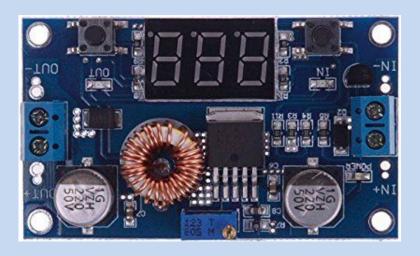

Solar Charging

5 Watt solar panel

Charge Controller

Discovery

Experimenting to find the right combination

Mounting

- Solid
 - Dense foam to protect the box and the accessories you can pack inside

- Spray in Foam
 - It was fun
 - Messy and it takes overnight to set up

Battery Tie Down

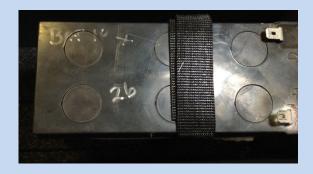

Tie wrap and cable tie mounts

Nylon strap and buckle

Moved to double sided Velcro

Project Selection

- Basic
 - Simple Battery
 - Fuse
 - 12v Socket
- Cadillac
 - Battery
 - Fuse
 - 12v socket
 - USB Charger
 - Anderson

Battery Capacity

 With a bigger box you can add a larger battery and more accessories

Basic Parts List

- Ammo box
- Battery
- Fuse holder and fuse

- Velcro Battery trap
- Dense Foam padding

Parts

 Plastic ammo boxes are available at Harbor Freight and sporting good stores

 Most of the other parts are available on Amazon

Cadillac Parts List

- Ammo box
- Battery
- Fuse holder and fuse

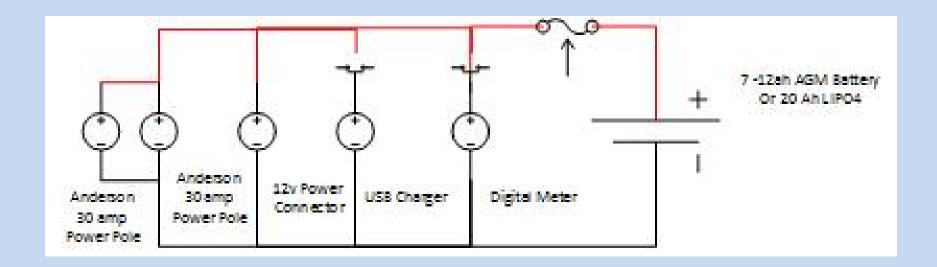

- Anderson connectors (optional)
- Battery strap
- Foam padding

Solar Charging

 The solar part was an afterthought on how to keep the battery topped off in the trunk of my car without over charging the battery. I was going to leave the charger on the rear deck of my car and run the wire through to the trunk.

Thanks

- Special Thanks
 - Joe Gardeski N6JO K6FRI Oceanside CERT
 - Tom Cowart W6ETC OCARC
 - Nicholas Haban AF6CF OCARA
